

PSYCHOLOGICAL THERAPIES IN ACQUIRED BRAIN INJURY

Friday September 21, 2018

JZ Young Lecture Theatre, Anatomy Building, Gower Street, University College London

The aim of this symposium to be held at UCL is to apprise healthcare professionals of the latest advances in psychological therapies for acquired brain injury.

It is increasingly being recognized that psychological issues following brain injury are as debilitating and as challenging as cognitive issues. Recent years have seen a number of developments and research findings which may guide practitioners who have to deal with such issues, and this event will help to inform high quality, evidence-based practice in this area.

Speakers

Speakers at this event are leaders in the field of psychological rehabilitation and brain injury, and are (in alphabetical order) – **Professor Nick Alderman, Professor Jonathan Evans, Professor Laura Goldstein, Dr Fergus Gracey, Dr Seb Potter, Professor Barbara Wilson, Dr Jill Winegardner, Dr Giles Yeates.**

Programme overleaf.

Limited number of places. Early Bird before July 1, 2018 – £165. After July 1, £195.

This includes refreshments on arrival, morning & afternoon refreshments, and a sandwich lunch
