The aim of this interactive workshop to be held at UCL is to apprise healthcare professionals of the latest advances in key areas of clinical neuropsychology. Talks will incorporate evidence-based guidelines in the diagnosis and assessment of a number of key neurological conditions, including various forms of dementia, and in the use of Smart Papers to help in this. Smart Papers are clinical note sheets that contain tips relating to neuropsychological assessment and diagnosis. A wide range of clinical videos will be included in the lectures. Delegates will be presented with a number of clinical scenarios for reflection and discussion. There will be Guest Lectures on Epilepsy and Cross-Cultural Neuropsychology, and an update on the use of memory aids in memory rehabilitation, which will include a 'live case'. All delegates will receive electronic PDF files of the talks, as well as a set of the latest versions of the Smart Papers. The workshop takes place shortly before the European meeting of the International Neuropsychological Society in London (July 6-8), which will include a symposium on cross-cultural neuropsychology chaired by Narinder Kapur.

Workshop Speakers

Professor John Hodges – Professor of Cognitive Neurology, Neuroscience Research Australia and University of New South Wales, Randwick, New South Wales. Australia. Professor Hodges is one of the world leaders in the field of dementia, having published several books and hundreds of papers on the topic. He is the author of the Addenbrooke’s Cognitive Examination.

Dr Narinder Kapur – Visiting Professor of neuropsychology at University College London, honorary consultant neuropsychologist at Imperial College NHS Trust, and consultant neuropsychologist at St James’ University Hospital, Leeds. He is past President and a founder member of the British Neuropsychological Society, and has authored/edited books in the field of Neuropsychology, as well as articles on neuropsychology, clinical excellence and patient safety.

Guest lectures will be delivered by Dr Steven Kemp, consultant epilepsy neuropsychologist, Leeds Neurosciences Centre and by Dr Aparna Dutt, senior neuropsychologist, Calcutta, India. Both Dr Kemp and Dr Dutt have published widely in their respective fields.

Limited number of places. Early Bird before May 31 – £145. After June 1, £175.

This includes morning & afternoon refreshments and a sandwich lunch

BOOKING FORM – NEUROPSYCHOLOGY IN CLINICAL PRACTICE WORKSHOP, UCL

Please reserve .......... place(s) @ £145 per place (£175 after June 1, 2016).

Any dietary preferences……………………………………………………………………

I enclose a cheque to the value of £ ........ Please make cheques payable to Narinder Kapur
(Workshop profits go to support Neuropsychology in India)
